

Don't compromise employee safety or your budget.

Employee safety is your top priority. But mesh protective equipment is expensive—and sometimes it doesn't last. Replacing worn-out mesh products without breaking your budget is a challenge, especially without compromising safety or OSHA regulations.

“

We have used International Services several times and we are absolutely delighted with their service. From day one, they provided full support and options to fulfill our needs. They took the time to explain their procedures and provided an accurate return expectancy.

BJ ALVARADO,
Preferred Beef

Don't replace damaged mesh PPE. Repair it at a fraction of the cost.

Get the most of your equipment budget

Spend less on new mesh protective equipment with certified repairs and restoration. Upgrade other equipment and reinvest in your operation.

Source like-new equipment at a fraction of the price

Don't just throw away your worn or damaged mesh protective equipment. Have it restored and refurbished for increased longevity and durability.

Protect and retain your employees

Give your frontline workers long-lasting protection from injury on the floor. Keep them safer and happier.

Certified repairs and engineered equipment to keep your people safe.

Certified chainmail repairs

We are the exclusive, certified Niroflex repair center in the United States. We use the best practices and techniques to repair your equipment while preserving your warranty.

Full-time, experienced staff

Our welders are full-time and on-site. With our dedicated senior team members, we can take a team-based approach to bulk repairs and high-volume projects.

Let's talk about your team's safety.

1

Gather Your Mesh

Round up your damaged and worn out equipment that needs to be repaired.

2

Send It In

Ship your mesh PPE to us and we'll take it from there, getting our certified team repairing your equipment.

3

Increase Safety and Savings

In as little as three weeks you'll receive your mesh PPE in like-new condition at a tenth of the cost.

Don't compromise employee safety to meet budget demands. Learn more about the certified repairs International Services provides.

International Services has been a strategic partner of NiroflexUSA for more than 15 years. When customers buy metal mesh gloves and garments from Niroflex, they are expecting premium quality. It was important to us to find a repair partner who has premium repair quality, and we found that in International Services. Their dedicated Niroflex repair area uses OEM Niroflex repair rings and parts, and the workers in this area are trained on Niroflex welding methodology. From incoming inspection to weld strength, we know that Niroflex users can count on the quality of repairs from International Services. This is why International Services is an Authorized Niroflex Repair Center.
