

Avoid the saddlepack slowdown: automate time-consuming taping.

Solve the bottleneck at the taping station. Increase your throughput by reducing manual labor and increasing efficiency at a key moment in your line. If you've been told it can't be automated, you haven't seen the Fremont Automation Saddlepack Taper.

Relieve production bottlenecks with the Saddlepack Taper

Easy to operate and maintain, you'll maximize up-time with this innovative, patent-pending equipment.

Keep your packages moving

Our saddlepack taper runs up to 20 packages per minute and can run in bypass mode if another product is on the line.

Fit your unique taping application

Our customizable design accommodates multiple taping applications based on your packaging needs.

Designed to fit your floorplan

The compact footprint and modular design make installation and maintenance easy. You'll have service and support after installation to make sure everything runs as planned.

Homegrown, down-to-earth innovation that improves the way your plant works.

Tailored solutions for your needs

We design equipment specifically for your unique challenges, ensuring a perfect fit to address space and operation issues.

Expert troubleshooting and integration

Count on us for in-plant troubleshooting and seamless integration, alleviating your worries about potential issues during and after the installation.

Turn-key installation

We manage the entire installation process, taking the burden off your plant. Our comprehensive approach minimizes downtime and disruption to make your life easier.

Let's stick to the plan.

1

The Talk-Through

Give us an idea of how you utilize manual taping processes so we know what kind of challenges you're up against.

2

What We'd Do

We'll show you how implementing our taping equipment can improve productivity and decrease downtime on your line.

3

Start Taping!

We'll work together to install your saddlepack taper and implement new processes that increase your throughput.

Increase your productivity with the one-of-a-kind Saddlepack Taper.
