

Saddlepack Depositor

Eliminate waste and downtime, whether you're transitioning from trays to pouches or increasing efficiency on an existing line.

Fast, Accurate Packaging Built for Poultry Plants.

Designed to increase speed without adding headcount, the automated Saddlepack Depositor integrates seamlessly with existing lines. Purpose-built for poultry processing, it delivers simple operation, low-maintenance reliability, and easy wash down.

Technical Specifications

Package Handling: Compatible with soft and rigid formed packaging. Customizable for any size or configuration

Package Throughput: Loads up to 160 pouches per minute

Electrical Requirement: 110 VAC 1Ph 4A (15A breaker)

Airflow Rate: 2.3 CFM at 50 PSI

Enclosure: Nema 4X, IP69, full wash down ready

Equipment Footprint: 12' x 6' x 6' (LxWxH)
Minimum aisle width of 7'

Sensor Connection: IO Link, quick-connecting M12

Precision Chutes

Liquid-collecting chutes guide product cleanly into the pouch to keep seals dry and reduce leakers. Dual sensors above each chute detect product presence and ensure consistent, accurate depositing.

Downgrade Chute

Separate chute for quick sorting of downgrade product.

Tray Table

Dedicated space for window dressing.

Seamless Integration

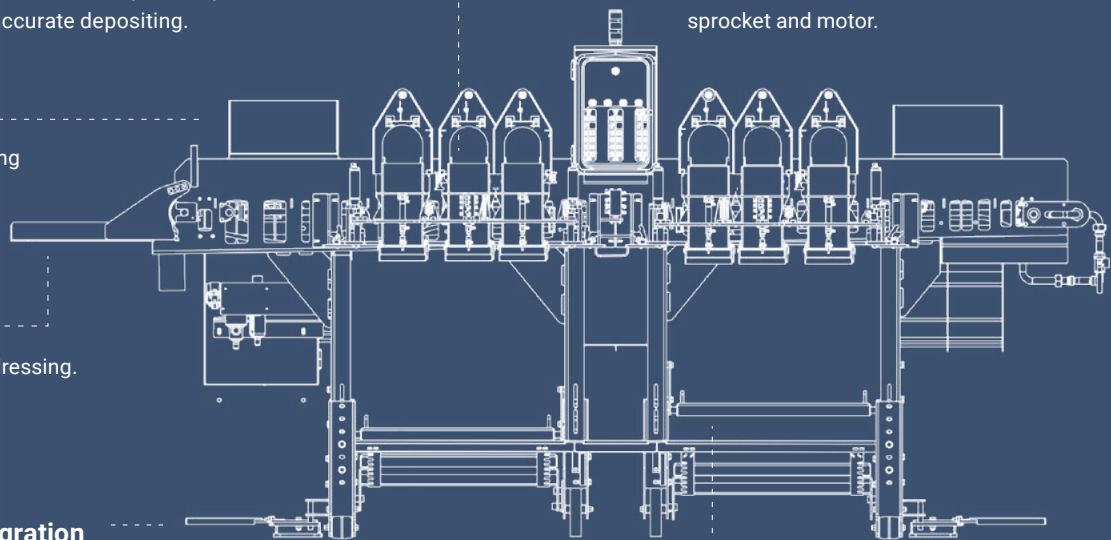

Low profile wheels slide easily under thermoformer.

Clean-In-Place (CIP) Belt System

Sanitize the entire belt system without disassembly. The CIP design cleans the inside and outside of the belt, as well as the sprocket and motor.

Height Adjustable Operator Platform

Improve ergonomics and safety for your diverse workforce.

We've put **Decades of Innovation** into Perfecting Poultry Packaging.

Built for Poultry Plants

Our packaging automation equipment was designed for the realities of poultry processing — from slippery product to wash down requirements. While other options adapt generic packaging equipment, we've built solutions that actually work in your plant.

Our Engineers Install and Support

After installation, count on us for in-plant troubleshooting and seamless integration, alleviating your worries about potential issues. We're a long-term partner for any maintenance or parts, thanks to a complete inventory of necessary hardware on hand.

Turnkey Installation

We manage the entire installation process, taking the burden off your plant. Our comprehensive approach provides a turnkey solution installed over a weekend to minimize downtime and disruption to make your life easier.

OEM-Agnostic

The automatic depositor connects seamlessly with upstream and downstream machines. You don't need to redesign your line to get the benefits of depositing automation.

Built in the Midwest.

Installed everywhere poultry is processed.

Reduce Downtime with Automated Poultry Package Depositing.

Eliminate leaky seals and rework with precision depositing that adds speed and accuracy to your poultry packaging line.
